PRODUCTS

Docket, Dhaka — *Founder, Developer*

May 2026 - PRESENT

Civic tech platform that turns Bangladesh government processes into structured, plain-language guidance for citizens, businesses, and legal professionals.

- Grew the platform to **380+ users in Bangladesh within two months of launch** with **zero** on ad-spend.
- Designed a structured JSON-based data model that powers guides, checklists, and document generation across the platform.
- Designed and built the platform using **Next.js, Supabase, and Tailwind CSS**.
- Deployed and maintained the production application on **Vercel**, with structured data separated from the presentation layer for reuse across features.

Project Apa, Dhaka — *Founder*

November 2025 - PRESENT

Grant-funded for Bangla-first documentation tool for grassroots organisations.

- Designed and built the product from requirements through implementation and deployment.
- Worked with **two pilot organisations** to gather requirements from non-technical users and translate them into product features.
- Designed a **Bangla-first interface and content model**, prioritising localisation rather than adapting an English-first product.
- Secured external grant funding to support development of the platform.

shitbucket.fyi, Dhaka — *Founder, Developer*

November 2025 - PRESENT

Installable PWA for low-friction idea capture.

- Built an **offline-capable Progressive Web App** using service

SKILLS

Frontend: React, Next.js (App Router), Tailwind CSS, PWA and service workers

Backend and data: Node.js, Supabase, PostgreSQL, REST, structured JSON content modelling

OS: Linux, Windows

Infrastructure: Vercel, Cloudflare (DNS, CDN, caching), CI/CD via Git

Tooling: Git, PostHog, Google Search Console, pandas

Practices: Technical SEO, offline-first architecture, security-sensitive data handling, browser automation for systems without APIs

EDUCATION

United College of Aviation, Dhaka — BSc in Computer Science and Engineering

2016 - 2022

Final project: Bangla fake news detection using machine learning.

workers.

- Evaluated Capacitor as an alternative for native packaging and selected a PWA approach to reduce maintenance overhead and accelerate development.
- Launched the product publicly and integrated **PostHog** to measure user retention before scaling.

EXPERIENCE

Comfort Group of Companies, Dhaka — *Digital Media Manager*

July 2024 - PRESENT

- Implemented website analytics and event tracking to measure traffic and conversion data.
- Automated content scheduling and reporting workflows, saving approximately **50 hours of manual work per month**.
- Ran paid social and multi-channel campaigns for residential property, generating the pipeline behind three closed apartment and house sales.

Web Developer (contract and volunteer)

Platform: Oboyob, Sompurna, SWASA, Baseline Basketball, and others

November 2019 - Present

- Built and deployed web applications with a focus on security, usability, and reliable data handling.
- Worked as the sole developer across projects, handling requirements, development, deployment, and handover.

Nighthawk Bangladesh, Dhaka - *Co-founder*

January, 2019

Co-founded a technology company with a university peer and organised two Capture the Flag competitions and one hackathon. Ceased operations during COVID-19.

Community & Training

2019 - 2024

Delivered **digital security and ICT training** for **60 women** in **Gazipur, Bangladesh** with the **Ministry of Women and Children Affairs (MOWCA)**

Speaker at a seminar with **GenLab and American Embassy on Digital Security**

Delivered **15 digital literacy workshops** with **IREX, Oboyob, Manusher Jonno Foundation**.

Language

Bangla (Native), English (Fluent), Spanish (Elementary, 570 days on duolingo - big fan of the green chicken)
